

## **On Street Parking of Commercial Vehicles**

The City of Naples has adopted a new ordinance relating to on-street parking for commercial vehicles in the Port Royal area effective January 18th, 2019. Details of the ordinance are listed in the Municode, where it is listed as “Adopted Ordinances Not Yet Codified”. 16-291 Construction Site Management is not affected as long as all parking requirements meet the guidelines of the site plan submitted by builder and approved by Craig Mole. He will be developing a guidance document for dissemination to all contractors. This will be helpful for the shift to electronic permitting since the current permit applications will be phased out. Craig will show on street delivery zone along with the requirement to obtain a ROW permit upfront during permit application that can last throughout the project as long as the permit is in active status, instead of 90 days
