

CBIA-CCGM Residential Permit/Inspections Task Force
Addendum-Other Items Discussed/Determined
May 21, 2015

1. A request was made for NOVA inspections results to be posted in “real-time”: This will be arranged moving forward. No start date identified. Request that start date be shared at our next meeting. County needs to provide access to Cityview for NOVA.
2. Master Plan Updates: Jonathan Walsh joined our meeting for discussion of this item. He requested that those builders who are affected by these updates look at their business and prioritize. This is a massive endeavor and prioritizing needs would help the County. It was noted that once the County goes to electronic filing, master plans will most likely go away.
3. The question was asked whether plans could be submitted prior to June 30th with the intention of following the 5th Edition Building Codes which will become effective June 30, 2015. Jonathan Walsh stated this could be done with the following communication...a cover letter submitted with plans indicating that you will be following the new code requirements. The code also will need to be referenced in the plans.
