

Growth Management Department Development Services Announces

Remote Inspection by Video Program in Response to COVID-19

In Accordance with Centers for Disease Control Guidelines

Subject: NEW SERVICE – Remote Inspection by Video Program

As part of Collier County's ongoing effort to limit the spread of COVID-19, Growth Management Department (GMD) Development Services is launching a program to conduct "remote" building inspections. Many building inspections currently require our staff to enter homes to view completed installation work. The Remote Inspection by Video Program allows you, the contractor, to have your installers record a video at the completion of their work, which you submit to our licensed building inspectors for code compliance review. This limits exposure for your installers, residents and our inspectors. The Building Plan Review & Inspections Division has chosen to focus on Air Conditioning Change-outs, Water Heater Change-outs and Door & Window Replacements first. Once the program is up and running, we will evaluate adding additional inspection types.

If you are interested in participating in the program, you will be able to register by 4/8/2020, for training on the requirements for the video recording and the process for uploading for review. Scheduling and inspection results will be provided through our normal CityView Portal operations.

To add your name to the registration list email your request to dianna.perryman@colliercountyfl.gov. Please include your phone and email contact information.
